

# DIGITAL TRANSFORMATION CONFERENCE ENERGY & UTILITIES 2021

2<sup>nd</sup> Edition, 24 March 2021, InterContinental Hotel Bucharest, 09:30-13:00

The Diplomat – Bucharest organizes the second edition of the online **DIGITAL TRANSFORMATION IN ENERGY & UTILITIES** on **March 24, 09:30-13:00**, at the **InterContinental Hotel** in **Bucharest**.

**Energy 4.0** is here and the digitization of this strategic sector implies the widespread use of digital machines and devices at all levels of the power system, from production and infrastructure to end-user devices. Energy 4.0, as it is known, enables the industry to implement intelligent energy and power management solutions based on machine to machine and machine-human interactions.

In this context, the energy sector is undergoing a transformation process and it tackles new business models and new priorities. The utilities industry: electric power, water, or transportation stands at the forefront of technology advance and the organizations and their CIOs should have a comprehensive digital assurance platform to prevent future challenges.
